she keeps busy with other interdisciplinary projects

for example, the botox can migrate and cause some paralysis around the eyes, there’s risk of infection from the injection etc

i had to make a choice between knowing that i was right or my mental and physical health

if it is left to the ic to decide how to produce a product or provide a service, then the ic is on the way to being classified as a “valid ic corporation.”

we now have a model whereby, in health and safety law, the risks and responsibilities sit with the governor, so the governor commissions and undertakes that risk assessment process
